Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

1. The substitute specification filed 10/17/2005 has not been entered because it does not conform to 37 CFR 1.125(b) and (c) because: No marked up copy of the changes to the original specification has been filed.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 11-24 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

4. Claims 11-24 are further rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

The disclosure of this application is internally inconsistent and/or incomplete. There appears to be no means for moving the lateral panels to their outward position of figures 2 and 3.

Art Unit: 3612

Applicant discloses that the figures 4-7 show the panel retracted. Applicant discloses that the panels remain retracted folded under the central panel when the roof does not apply pressure on the stops ((50). Applicant discloses that in figures 5 and 6, the lateral panels 8a,8b are in their retracted position under the central panel. Yet, inexplicably, applicant discloses that the connecting rods 40a, 40b, immobilized by the corresponding stop arms 46, retains the corresponding spherical joint 42, which pivots the lateral panel 8a, 8b towards its retracted position with respect to the central panel when the latter pivots. Therefore, applicant discloses that the lateral panels, retracted in figures 4 and 5, are also retracted into the figure 7 position. How can this be?? Further, nowhere in the disclosure is it apparently disclosed how the panels 8a,8b return to the deployed position from the retracted position.

As a result of these shortcomings, it is not clear if applicant had possession of the complete invention at time of filing and it is not clear how one of ordinary skill in the art could make and use the invention.

Further, these obvious shortcomings preclude a search on art for the invention as applicant has not apparently disclosed same.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dennis H. Pedder whose telephone number is (571) 272-6667. The examiner can normally be reached on 5:30-2:00.
